## WHY A STRATEGIC VALUE ASSESSMENT?

Whether you need to staff your teams, align strategy with industry best practices, or accelerate delivery with pre-built solutions — the SVA identifies the highest-impact opportunities across Dev, QA, and Ops/Support.

### Maturity Baseline

Benchmark Dev, QA & Ops capabilities

### Gap Analysis

Identify staffing & process gaps

### Quick Wins

Accelerator-powered fast starts

### Strategic Roadmap

Industry-aligned consulting plan

### ROI Projections

Business case with real numbers

## HOW WE DELIVER VALUE

Across Dev, QA, and Ops/Support — we staff, consult, and build to meet you where you are.

### Staff with Perform

Embedded engineers & specialists

### Consult with Perform

Strategy, SMEs & industry guidance

### Build with Perform

Accelerator templates & solutions

#### Dev

Full-stack engineers  
DevOps & CI/CD specialists  
Cloud & infra engineers

Architecture reviews  
Tech stack modernization  
Industry-aligned dev practices

CI/CD pipeline accelerators  
Microservices templates  
API integration frameworks

#### QA

SDET & automation engineers  
Performance test engineers  
Manual/exploratory testers

Test strategy & governance  
AI/ML testing readiness  
Compliance & regulatory QA

AI test generation engines  
Self-healing frameworks  
Test data management suites

#### Ops / Support

SRE & monitoring engineers  
Production support analysts  
Incident response teams

AIOps strategy & roadmap  
Observability maturity  
Runbook & SLA optimization

Monitoring dashboards  
Support automation & triage solutions  
Self-service ops portals

#### Perf Eng

Load & stress test engineers  
Performance architects  
Capacity planning analysts

Perf strategy & benchmarking  
Scalability & resilience reviews  
SLA/SLO optimization

Load test accelerator suites  
APM & observability templates  
Perf regression pipelines

## WHAT WE ASSESS

### Staffing & Skills

- › Dev/QA/Ops/Perf skill gaps
- › Team scaling readiness
- › Knowledge retention
- › Talent pipeline health

### Process Maturity

- › CI/CD integration
- › Test data management
- › Quality gates & governance
- › Release process efficiency

### AI & Automation

- › AI test generation readiness
- › AIOps & intelligent triage
- › RAG-based assistants
- › Self-healing automation

### Data & Analytics

- › Observability & monitoring
- › Test coverage visibility
- › Metrics-driven decisions
- › Executive dashboarding

### Quality Engineering

- › Test strategy & planning
- › Shift-left practices
- › Compliance & regulatory QA
- › Defect prevention

### Performance Engineering

- › Load & stress test coverage
- › Scalability & capacity planning
- › APM & observability maturity
- › Perf regression & benchmarking

### Technology Stack

- › Tooling evaluation
- › Framework modernization
- › Accelerator template fit
- › Scalability assessment

## 2-WEEK ENGAGEMENT TIMELINE

1

### Kickoff Call

30-60 min

Discuss goals & challenges  
Align on scope & priorities  
Set success criteria

2

### Self-Assessment

1-2 hrs

60-question survey  
6 focus area evaluation  
Maturity & pain points

3

### Analysis

1-2 hrs

Review responses  
Stakeholder follow-ups  
Opportunity mapping

4

### Delivery

60 min

Executive readout  
Quick wins & strategy  
ROI projections

## WHAT YOU RECEIVE

Executive SVA Report

Maturity Scorecard

Prioritized Roadmap

ROI Business Case

AI Enablement Plan

## PROVEN OUTCOMES

80%

### Efficiency Gains

From AI + RAG-powered test scripting

60%

### Faster Test Creation

Automated generation from specs & PRDs

50%

### Defect Detection ↑

Improved coverage & shift-left practices

285%

### First-Year ROI

Typical return from strategic investments

40%

### Cost Reduction

Through automation & process optimization

3×

### Faster Releases

With CI/CD integration & quality gates

*Based on anonymized results from recent client engagements*
